JOURNAL OF OBJECT TECHNOLOGY

Editorial

Dear Readers,

I welcome Lakshmi Prayaga who has contributed a Guest Column on Game Programming to this issue of JOT. She will more than likely return with additional regular columns on this subject in the future. I welcome back Mahesh Dodani and Won Kim with a continuation of their regular columns. I appreciate the continued contributions of Douglas Lyon and John McGregor with their columns.

I believe you will also enjoy our four full-length papers. Summaries of each are provided on our web page.

Richard Wiener
