

UNDERSTANDING THE EXAM EXPERIENCE

Thank you for completing this questionnaire, it will help us understand your experience of undertaking in-person exams within a traditional exam setting compared to several years on online exams following COVID.

We would like to assess the value and benefits of the exams to help inform us in future years and how they may be deployed within the curriculum.

The results of this questionnaire are anonymous, and completion of the questionnaire is voluntary, but it would be much appreciated if were able to take a couple of minutes to complete it.

Many thanks

Dr Charlotte Lyddon

Dr Lyddon will use the anonymous information collected within her PGCAP independent study undertaken at the University of Liverpool, the results of this work may subsequently be published.
